## Overview

- Background research
- Conceptual model
- Results from pilot study
- Efficacy trial
- Implications

## Growing childhood obesity epidemic in US

- 1 in 5 preschoolers are overweight
- 1 in 8 are obese
- Numbers higher for children living in poverty

(Institute of Medicine, 2005; Ogden, Carroll, Kit, & Flegal, 2012; Wang & Lim, 2012)

## Health risks of child obesity:

- High blood pressure
- High cholesterol
- Kidney disease
- Type II diabetes

Obesity accounts for 20% of all health care expenditures

(Cawley & Meyerhoefer, 2012; Deckelbaum & Williams, 2001; Vos & McClain, 2008)

Early Head Start identified the absence of effective programs to address child obesity

Penn State researchers engaged in community-based participatory research collaboration

# *Recipe 4 Success*

**Promoting children's self-control skills and  
healthy eating habits in Early Head Start.**

Recipe 4 Success based on research findings in four areas

# 1. Parents' supportive feeding practices affect children's healthy eating habits

- Expose children to foods 10-20 times
- Only milk or water to drink
- Let children choose among healthy options
- Model enjoyment of healthy food

(Brown & Ogden, 2004; Fisher & Birch, 2002)

## 2. Children's self-control skills predict BMI from an early age

(Francis & Susman, 2009)

### 3. Parents' sensitive scaffolding improves children's self-control skills:

- Behavior descriptions
- Reflections
- Specific praise
- Choices

(Hembree-Kigin & McNeil, 1995; Hughes & Ensor, 2009; Hustedt & Raver, 2002)

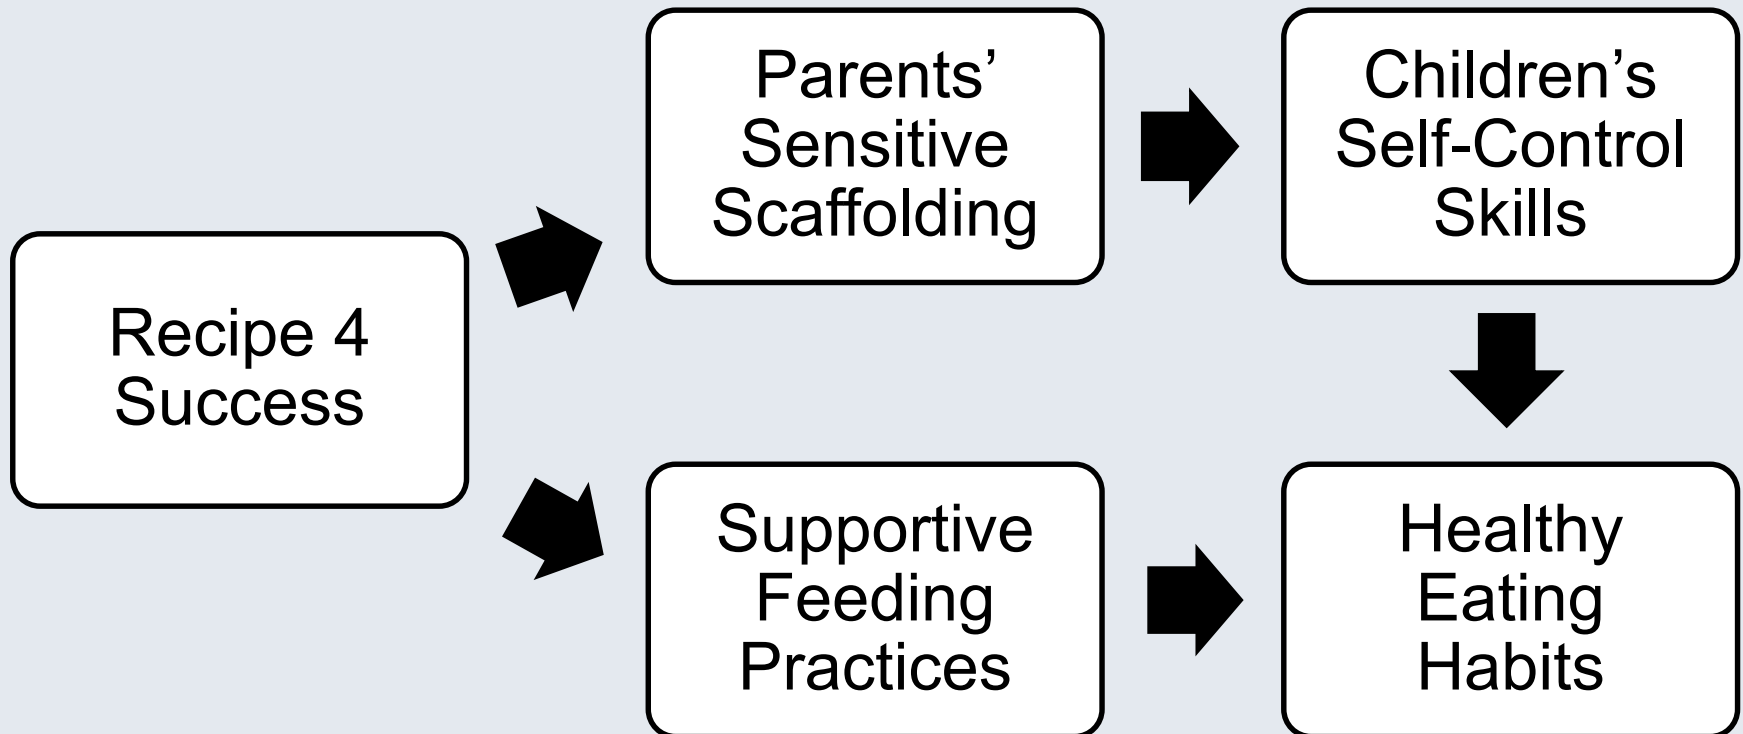

#### 4. Children more likely to eat healthy foods they help prepare:

- They are invested in food
- New ingredients become familiar through cooking

(Knai, Pomerleau, Lock, & McKee, 2005)

# Recipe 4 Success Logic Model

## RECIPE 4 SUCCESS

### Spinach Quesadilla

1. Cut two slices of cheese in half.
2. Arrange cheese in shape of cross on tortilla.
3. Cook 4 bunches of frozen spinach in microwave for 1 minute.
4. Use paper towel to press extra water from spinach.
5. Lay spinach on cheese on tortilla.
6. Cook tortilla in microwave for 1 minute.
7. Roll up quesadilla by repeatedly folding over 2-inch piece of tortilla.

#### Variation:

Add mashed pinto or black beans to quesadilla.

### Ingredients

- 1 whole wheat tortilla
- 2 slices of cheddar (or American) cheese
- 4 bunches of frozen spinach

## 10-lesson cooking curriculum:

- Embedded within Early Head Start home visits
- Practice parent scaffolding and child self-control
- Provide parents with information about child eating
- Expose children to new foods

## Recipe 4 Success Pilot Study

- 74 Early Head Start families
- 52% Black and/or Latino
- Randomly assigned to intervention or home visits  
“as usual” within caseload
- Extensive assessments pre- and post-intervention

# Supportive feeding practices

Parent report

$$d = .87^{***}$$

# Sensitive scaffolding

Video ratings

$$d = .58^*$$

## Ability to wait

Direct testing

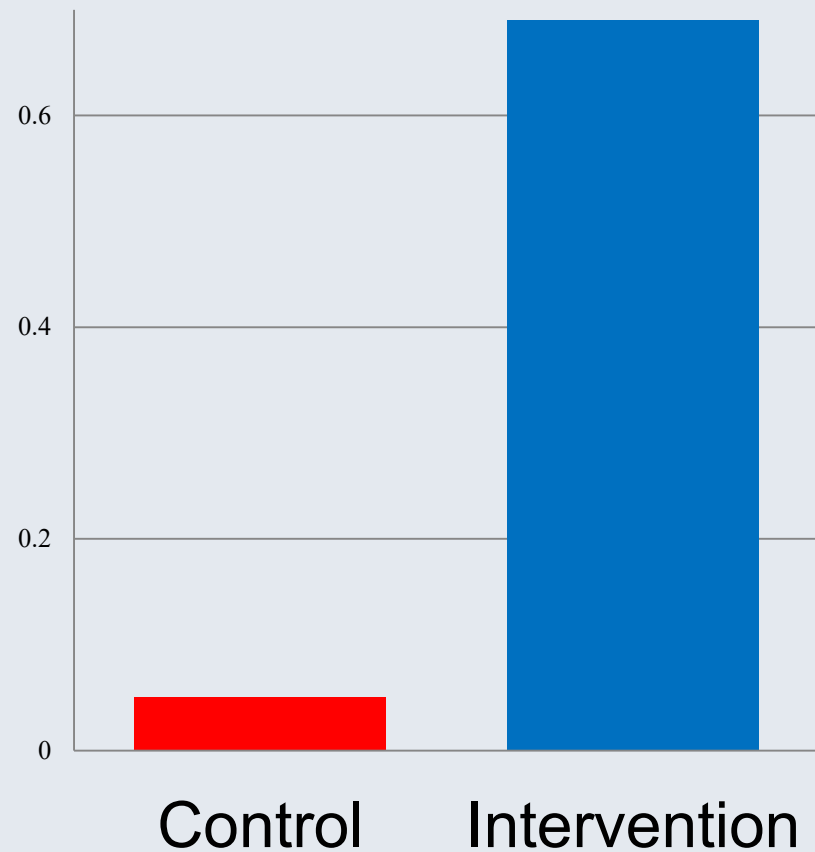

$$d = .84^{***}$$

## Concentration

Observer rating

$$d = .64^*$$

Child ate  
balanced meal  
24-hour food log  
 $d = .57^*$

Healthy  
body mass index  
24-hour food log  
 $OR = 5.98^*$

## Recipe 4 Success Efficacy Study

- 290 parents and toddlers
- Offered in Early Head Start centers in 7 U.S. cities
- Implemented in Spanish and English
- Pre- and post-intervention assessments
- 6- and 12-month follow-up assessments

## Recipe 4 Success intervention:

- Focuses on high risk population
- Targets multiple important outcomes
- Takes advantage of pre-existing national infrastructure
- Brief, focused module can be easily integrated into ongoing curriculum

Thank you!
